The patentability of the instant claims is based upon the prior art and the issues addressed through out the prosecution history of this application. Isolated protease peptides and a nucleic acid encoding the same. The closest prior art of Williams [U.S.P. 5,032,396, July 16, 1991, cited in prior Office Action] teaches the structure of a protease sensitive peptide sequence comprising the amino acid sequence - GLN-LYS-LYS-ASN-ASP-ALA, but does not match the claimed protease peptide of SEQ ID NO: 16, nor provide motivation to one of ordinary skill in the art to use the skills available in the area of enzymology/molecular biology, to make the invention obvious.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
